EXPERIENCE

1. Web and Android Development Intern at JVG Digitech

Sept 2024 – Jan 2025

- Developed responsive websites and web apps tailored to client requirements, ensuring high performance and scalability
- Revamped UI/UX for client platforms, improving usability and increasing user engagement.

PROJECTS

MediMate.ai – A Virtual Health Care Assistance | ([GitHub](#))

- Developed MediMate.ai, a cross-platform AI-powered healthcare assistant offering doctor discovery, emergency alerts, and instant medical support through a smart interface.
- **Integrated a voice-enabled chatbot** using Ollama, **capable of offline**, natural language medical conversations; empowered users to upload prescriptions and receive detailed, structured summaries including medicine usage and follow-up dates.
- Engineered real-time backend with Firebase, enabling live doctor availability, emergency response triggers, and secure, responsive patient-doctor interactions.

Smart Inventory Management System | ([GitHub](#))

- Designed and developed a web-based inventory management system for **Kenn India Company**, optimizing stock control, automating workflows, and boosting operational efficiency across departments
- Implemented end-to-end solution with modules for purchase, sales, stock tracking, supplier management, and analytics — ensuring seamless inventory control across all business functions

Live Freelanced Projects (rngandhischool.org) (kalliski.in)

Extra Curricular Activities

- I joined as Student Advocacy Head during first year of college in Saarthi Club ([Photo](#)).
- From 2nd year I worked as App Developer at Innovsphere.
- Also I was Web Developer at Entrepreneurship Development Cell, There I developed websites for their club also there various events [Club Website](#) , [E-Summit 2025 Website](#) .
